

# Personalised Care Programme in GM

Freya Howle – Programme Director

## What is ‘personalised care’?

The NHS Long Term Plan for Cancer states that “*where appropriate every person diagnosed with cancer will have access to personalised care, including needs assessment, a care plan and health and wellbeing information and support.*”

The ideal pathway would be for all patients to be offered the following:

Digital remote monitoring system to record these interventions electronically and provide a patient portal

## How can we improve it?

GM Cancer want to go further than just the national ambitions.

A Workshop held in July with a wide range of stakeholders including patients has informed our plan – this is what people thought personalised care should be :

## Our plan:

**Equality - Innovation - Collaboration**
